

## ABSTRACT

A light and portable adhesive tape cutter according to the invention includes a gathering section having elasticity. Two ends of the gathering section are respectively devised with a fixed cutter seat and a  
5 sliding cutter seat each having a sawtooth. The gathering section is appropriately wrapped by an adhesive tape roll. The sliding cutter seat is capable of sliding movements to become mounted on the fixed cutter seat to altogether cut off the adhesive tape in a quick and convenient manner. The adhesive tape cutter may also be a simplified cutter seat  
10 as a formed integral that can be rapidly wrapped by an adhesive tape roll for quickly cutting off an adhesive tape.
